Education

•Kakatiya Institute of Technology and Science, Warangal, Telangana *2022 - Present*
Bachelor of Computer science and Engineering CGPA: 7.6

•SR Junior College *2020 - 2022*
Intermediate Percentage: 86%

•Ekashila Techno School, Hanamkonda *2020*
SSC CGPA: 10

Personal Projects

•AI-Based Resume Enhancement Tool

- Tools & technologies used: Next.js, TypeScript, Tailwind CSS, React, Google Gemini AI
- Features: AI-powered resume analysis, ATS optimization, PDF upload & parsing, real-time preview, multi-template resume generation, auto-save with local storage
- API Integration: Gemini API
- Built an AI-powered resume enhancement platform that analyzes resumes using Google Gemini AI, provides ATS compatibility scoring, generates personalized improvement suggestions, and enables dynamic resume creation with real-time preview and professional templates.

• Quiz Application (MERN Stack)

- Tools & technologies used: MongoDB, Express.js, React.js, Node.js
- Features: Responsive UI, efficient data management with MongoDB
- Built a MERN stack quiz application featuring secure user authentication, dynamic question rendering, and a real-time leaderboard system.

• Educational Blog (MERN Stack)

- Tools & technologies used: MongoDB, Express.js, React.js, Node.js
- Features: Responsive UI, optimized backend APIs for content management
- Developed a MERN stack educational blog platform featuring user authentication, categorized posts, and a comments section. Integrated a rich text editor for creating blog content and built efficient backend APIs with a responsive, user-friendly front-end interface.

• Online exam proctoring system using computer vision and bio metrics

- Tools & technologies used: ReactJS, Node.js, Express, MongoDB, Python (OpenCV, ML libraries)
- Proctoring systems assist in monitoring candidates using technology, and this project focuses on automated monitoring to ensure exam integrity.
- Built an online exam proctoring system to ensure fair remote examinations through secure authentication and automated monitoring. Implemented using React, Node.js, and MongoDB, with future integration of AI modules for detecting suspicious activities.

Technical Skills

Languages: Java, HTML, CSS, Python, JavaScript
Frontend: React, Tailwind CSS
Backend: Node.js, Express.js, Flask
Databases: MongoDB, MySQL
AI/ML Frameworks: Tensorflow
Coursework: Object Oriented Programming, Database Management Systems, Data Structures and algorithms
Areas of Interest: Artificial Intelligence, Web Development

Certifications

•Salesforce Certified Agentforce Specialist - Trailhead Academy *Salesforce*

•Programming Through Java - Elite Certificate *NPTEL*

•Java Programming language - Basic *Hackerrank*

•Python Programming language - Basic *Hackerrank*

Achievements

–Hackathons Participated in hackathons, developing innovative AI and web solutions

Extra-Curricular Activities

•Student Organizer-Coordinated technical events for university tech fest, enhancing organizational skills

•Student Coordinater-Organised many events as part of the NSS club at my college
